What We Do

Team Augmentation

A team of 4000+ Battle Tested engineers across 100+ Different Stacks.

We are your Digital Factory, dedicated teams to supercharge your development throughput.

0 Operational Overheads.

Agile & On Demand.

Fixed Scope

We offer meticulously crafted project specifications and timelines for cutting-edge development, seamless integrations and feature-rich solutions.

The NeoSOFT approach ensures your projects are delivered with precision and excellence.

Managed Services

Our IMS services helps enterprises to run Business as usual.

With strong SLA driven services, 24x7 Support, Governance and Technology expertise, we help to optimize processes and costs.

Our Expertise

We help businesses wherever they are in their digital journey. From consulting for a **digital transformation** to carving out a **technology roadmap**. Our expertise helps you to **drive ROI** from your digital initiatives.

The background features a series of thin, wavy red lines that create a sense of motion and depth. These lines originate from a dark, circular shape at the bottom left and fan out towards the right, where they become more densely packed and brighter. The overall effect is reminiscent of a stylized sunburst or a ripple effect in water.

Boston Consulting Group

A Comprehensive Software System for Major Banking Institution

Designed a versatile mobile and web application for enhancing organizational effectiveness.

Analytics and Reporting

UI/UX

Cross-platform Functionality

Performance Optimization

Outcomes

65% Enhanced Data Visualization

- Enabled the creation of visually appealing and insightful dashboards, facilitating better decision-making through comprehensive data visualization.

2x Streamlined Communication

- Improved internal communication among bank employees, enabling faster collaboration and decision-making across different departments and branches.

74% Optimized Performance

- Improved system performance, resulting in faster response times and enhanced overall user experience, even during peak usage periods.

Solutioning

Challenges

- Rendering complex data into meaningful charts and graphs.
- Ensuring the platform can handle increasing user loads and data volumes.
- Implementing real-time data processing for features like notifications and updates.

Technical Spotlight

- Leveraged Fusion Chart and HighCharts libraries to render complex data into charts and graphs.
- Leveraged Laravel's built-in scalability features, such as caching, queue management, and database optimization.
- Utilized AJAX and WebSockets to enable real-time data processing.

Solution Highlights

- Enhanced data visualization, improving insights into key metrics and trends, and ensuring better decision-making.
- Improved platform performance, scalability, and reliability, even under heavy loads.
- Enhanced user engagement and improved communication, and collaboration among users in real-time.

A Platform for Communication and Collaboration between Partners

Built a centralized hub to enable partner access to resources, information, tools, and support.

API Integration

Data Visualization

Database Management

Performance Optimization

Outcomes

4x Streamlined Collaboration

- Facilitated seamless communication and collaboration, centralizing resources and tools to enhance productivity and efficiency.

80% Improved User Experience

- The user interface was revamped to provide a more intuitive and visually appealing experience, enhancing user satisfaction and engagement with the platform.

3x Efficient Functioning

- Streamlined administrative tasks, empowering administrators to effectively oversee and manage partner interactions and data.

Solutioning

Challenges

- Developing a platform that functions seamlessly across operating systems.
- Managing and integrating data from various sources efficiently while maintaining data integrity.
- Designing an intuitive and visually appealing user interface.

Technical Spotlight

- Leveraged Node.js for backend development and Angular 4.0 for frontend development.
- Employed MySQL 4.0 for data storage and management, providing a reliable solution for integrating and managing partner information.
- Utilized Angular 4.0, HTML5, and CSS for the creation of an aesthetically pleasing user interface.

Solution Highlights

- Ensured compatibility across various devices and browsers, making the partner portal more accessible.
- Optimized data storage and retrieval, improving the reliability of partner information and reports on the portal.
- Provided a more intuitive and visually appealing experience, enhancing user satisfaction and engagement with the platform.

A Leading Global Brand In Home Fabrics And Décor

Integrated responsive customer service through direct coordination, email support, and feedback options.

Customer service

Feedback Integration

Personalized Support

Geo-location

Outcomes

Responsive Query Resolution

- Enabled immediate coordination with company executives via helpline or email for any product, order, return, or cancellation-related queries ensuring swift issue resolution.

Personalized Assistance

- The provision of a helpline and email ID ensured direct assistance and personalized support, enhancing the overall shopping experience.

Location-Based Services

- Using geo-location to locate nearby stores, made it easier for customers to find Exclusive Outlets, Multiple Brand Outlets, Dealers, and Franchises.

Solutioning

Challenges

- Simplifying navigating features such as the fabric calculator, appointment booking, and store locator.
- Ensuring clarity in coordinating with company executives for product, order, return, or cancellation queries.
- App performance may be limited on older devices or lower OS versions.

Technical Spotlight

- AlloyUI boosted app aesthetics and functionality with sleek, responsive interfaces.
- Google Cloud Messaging facilitated real-time updates, ensuring prompt notifications for issue resolutions or service updates.
- Java (Android) and Objective-C (iOS) optimize the app for Android and iOS devices, respectively, ensuring efficient performance on each platform.

Solution Highlights

- Enhanced the user interface with tutorials or tooltips to aid in navigating diverse features ensuring a smoother user experience.
- Improved the app's customer service interface for faster, transparent communication and issue resolution.
- Regular updates improved app performance across various devices and OS versions, ensuring smoother functionality and accessibility.

A Leading Full-Service Brokerage Firm in India

Designed a comprehensive digital tool for efficient lead management and performance tracking.

Performance Optimization

UI/UX

API Integration

Database Management

Outcomes

3x Reduced Server Response Time

- Implemented advanced caching mechanisms and server optimizations, resulting in significantly faster response times for user requests.

40% Reduced Data Transfer Costs

- Implemented data compression algorithms and optimized data transmission protocols, resulting in significant cost savings on data transfer and storage.

65% Increased System Scalability

- Implemented horizontal scaling strategies and cloud-based infrastructure, enabling the system to handle a significantly higher load with minimal performance degradation.

Solutioning

Challenges

- Balancing functionality with performance to ensure the app runs smoothly on different devices.
- Managing data synchronization between the mobile app and server databases to ensure data consistency.
- Designing an intuitive and user-friendly interface to enhance the overall user experience.

Technical Spotlight

- Employed Android (Java) for native app development, leveraged Chart.js and HighCharts for data visualization.
- Implemented real-time data synchronization with Node.js, Express Framework for backend development.
- Utilized PHPEXcel for generating dynamic reports and data visualizations, providing users with interactive and visually appealing content.

Solution Highlights

- Resulted in a smooth and responsive app experience, enhancing user satisfaction and retention.
- Enabled real-time access to updated information, improving data accuracy.
- Enhanced user engagement and retention by providing an intuitive and visually appealing interface, leading to higher user satisfaction and adoption rates.

Develop an intuitive and user-friendly web application to effectively measure salesforce performance.

Database Management

UI/UX

Data Analytics

Cloud Computing

Outcomes

45% Increased Productivity

- Dashboards that accurately visualized the sales performances enabled productivity boost.

8x Process Efficiency

- Real-time analytics and dedicated modules for admin, users and schedulers.

30% Metric Transparency

- Greater data transparency facilitated through advanced analytics.

Solutioning

Challenges

- Absence of a centralized system to track partner and channel-wise sales performances across various levels of the organization.
- No method of leveraging data to gain insights, understand customer behaviour, market trends, etc.
- Difficulties in organizing and scheduling meetings.

Technical Spotlight

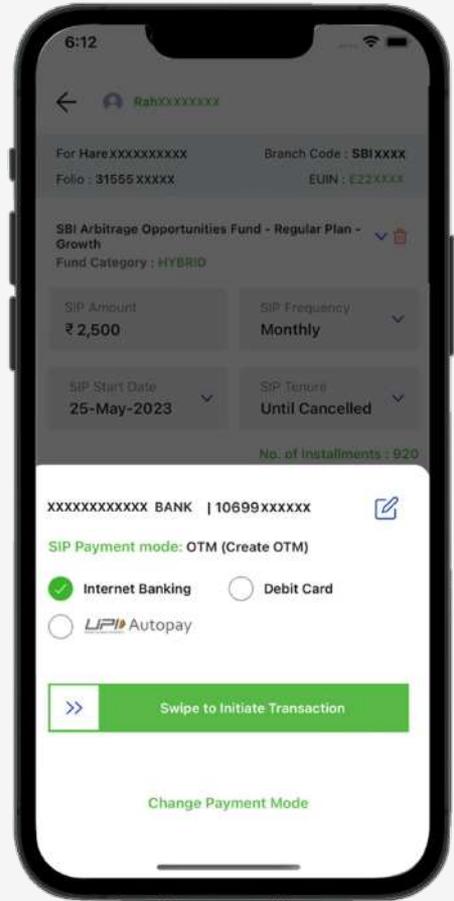

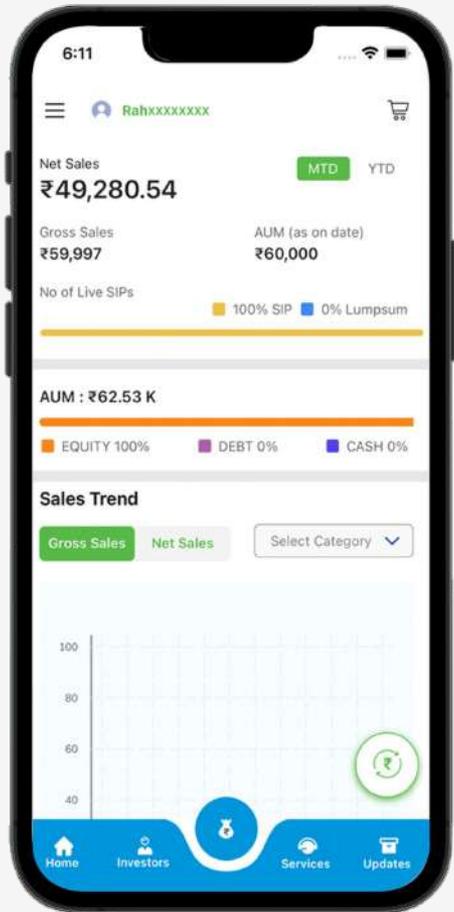

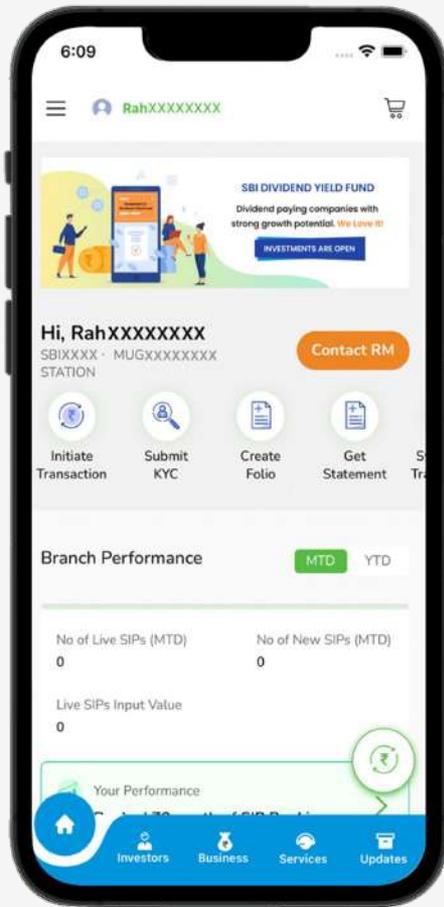

- Achieved faster development time and high scalability through C#.
- Experienced intelligent and secure database capabilities with MSSQL Server and attained persistent memory support.
- A visually appealing interface was implemented using CSS3, HTML5, and JavaScript to enhance the user experience.

Solution Highlights

- Analyzing salesforce performance at multiple organization levels.
- Mirroring functionality for the client's mutual fund business.
- Real-time sales tracking and meeting scheduling.

Tech Stack

A Digital Tool for Details of Road and Highway Projects

Built a comprehensive portal to streamline project operations from inception to completion..

Real-time Updates

UI/UX

Scalability

Asynchronous Data Processing

Outcomes

65% Better Project Management

- Streamlined project management processes, enhancing efficiency in tracking project details, coordinating tasks, and resolving defects.

5x Enhanced Data Visibility

- Facilitated comprehensive data storage and retrieval, offering stakeholders enhanced visibility into project statuses, resource allocation, and financial transactions.

70% Enhanced User Experience

- Ensured a responsive and user-friendly interface for the application, improving user engagement and satisfaction levels.

Solutioning

Challenges

- Managing vast amounts of project data, such as details of road projects, tender submissions, bidding processes.
- Providing real-time updates on project statuses to stakeholders dispersed across various regions.
- Effectively visualizing project data, such as road networks, construction sites, and project timelines, to provide actionable insights to stakeholders.

Technical Spotlight

- Utilized MS SQL for efficient data storage and retrieval, and data partitioning to handle large volumes.
- Implemented AJAX for asynchronous data exchange between the server and client-side application.
- Integrated Google Maps API for geospatial visualization of road projects and display project locations, road networks, and construction sites.

Solution Highlights

- Enhanced data organization and retrieval efficiency and improved database performance.
- Ensured seamless real-time updates for stakeholders.
- Enhanced visualization of construction progress and project timelines and enabled better decision-making based on geospatial insights.

What's New

> Entrustment of NH-137 (Entire NH in the State of Manipur)

Digital Banking Platform By A Major Indian Public Sector Bank

Streamlining resource management and employee performance evaluation.

Resource Management

Target Setting Optimization

Performance Enhancement

Unified Performance Review

Outcomes

15x Better Employee Performance

- Improved performance tracking via Insight dashboard and deep-dive pages leads to targeted KRA improvements.

5x Efficient Resource Allocation

- Role Allocator module optimized resource management by streamlining role allocation, ensuring effective personnel assignment to meet objectives.

35% Holistic Performance Review

- Ensured a responsive and user-friendly interface for the application, improving user engagement and satisfaction levels.

Solutioning

Challenges

- Handling large volumes of data (approximately 3 lakhs rows) through upload modules.
- Providing deep-dive performance data access across various organizational levels.
- Setting targets for branches, zones, and regions based on complex calculations requires precision and accuracy to align with organizational objectives.

Technical Spotlight

- Utilized CodeIgniter's file upload library to handle large CSV or Excel files for data uploads.
- Developed custom SQL queries to fetch performance data across organizational levels.
- Implemented complex calculation logic and data analytics using PHP.

Solution Highlights

- Optimized data processing algorithms and batch processing techniques to handle large datasets efficiently.
- Implemented role-based access controls to based on hierarchies.
- Utilized data analytics and forecasting techniques to generate accurate target projections.

A Convenient QR Code-Based Payment Solution

Provided a seamless and secure method for making transactions.

Payment Integration

QR Code Technology

UI/UX

Security

Outcomes

70% Improved Convenience

- Facilitated seamless transactions, enhancing convenience for consumers and merchants alike.

3x Increased Brand Loyalty

- Fostered trust and loyalty among customers, contributing to a stronger brand reputation and customer retention.

80% Enhanced Transaction Security

- Ensured robust security measures, safeguarding sensitive user information and financial transactions from potential threats or breaches.

Solutioning

Challenges

- Developing robust Android applications using Java with the intricacies of the Android platform.
- Managing data efficiently, especially in offline scenarios, ensuring synchronization with the server.
- Implementing real-time communication features.

Technical Spotlight

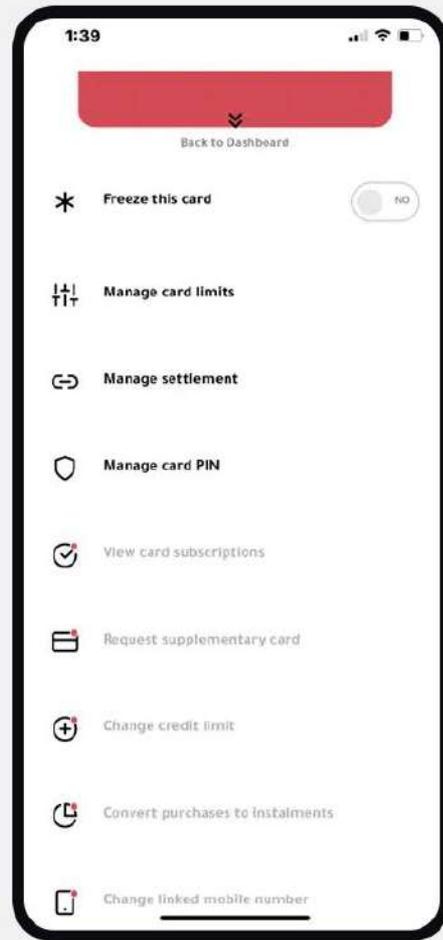

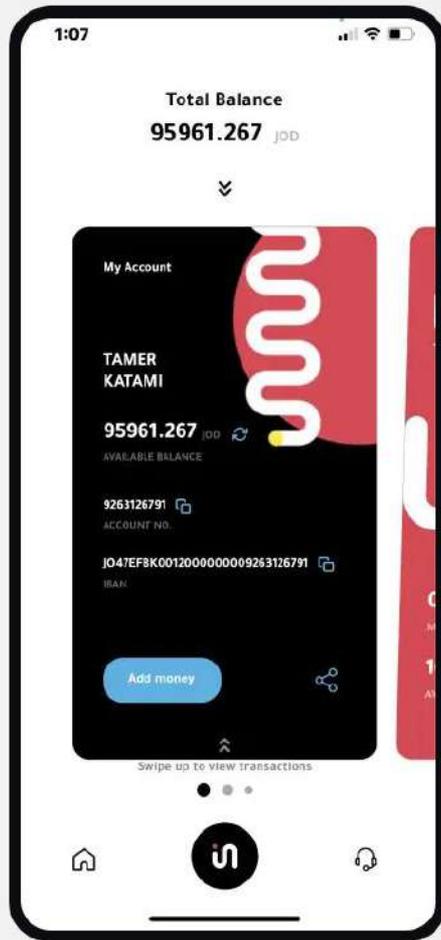

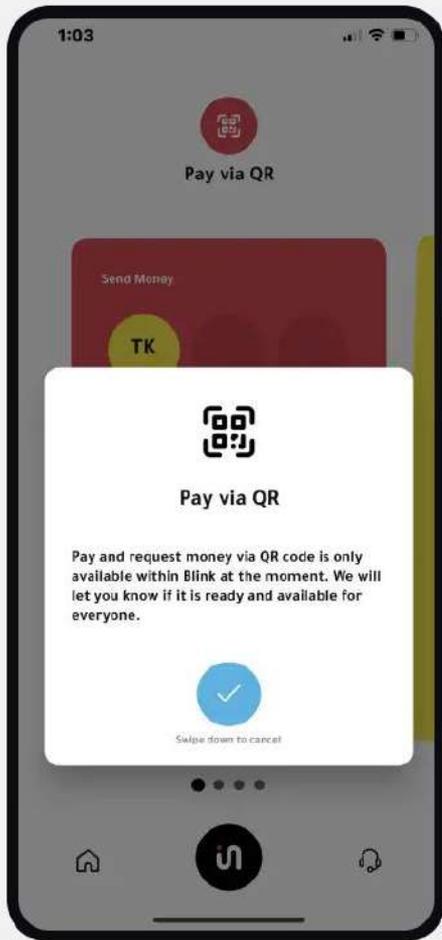

- Leveraged Core Java and Android (Java) for development, providing a robust framework for scalable apps.
- Utilized SQLite for local data storage and Firebase for real-time data synchronization.
- Integrating Google Cloud Messaging and Firebase Cloud Functions facilitates real-time communication and server-side logic execution

Solution Highlights

- Simplified the development process, leading to faster time-to-market and reduced development overheads.
- Provided users consistent data access and a smooth offline experience.
- Enabled efficient real-time communication, allowing users to receive timely updates and notifications.

Tech Stack

McKinsey & Company

Online Tool for a Leading Construction & Engineering Company

Crafted a comprehensive management & communication tool.

Enterprise Solution

Scalability

Database Management

Cross-browser Compatibility

Outcomes

67% Enhanced Collaboration

- Fostered greater collaboration among participants, mentors, and program administrators.

4x Increased Program Efficiency

- Ensured reliable and scalable performance, contributing to a more efficient and responsive online tool.

80% Better Leadership Development

- Through interactive features and data-driven insights, participants experienced a substantial improvement in leadership skills and capabilities.

Solutioning

Challenges

- Handling potential increases in user traffic and data volume.
- Protecting sensitive user and organizational data from unauthorized access.
- Implementing features for seamless, real-time interaction among users.

Technical Spotlight

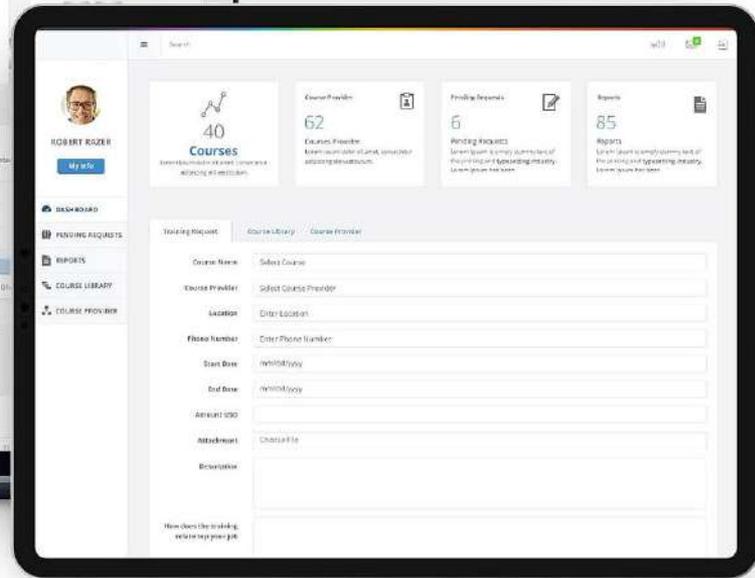

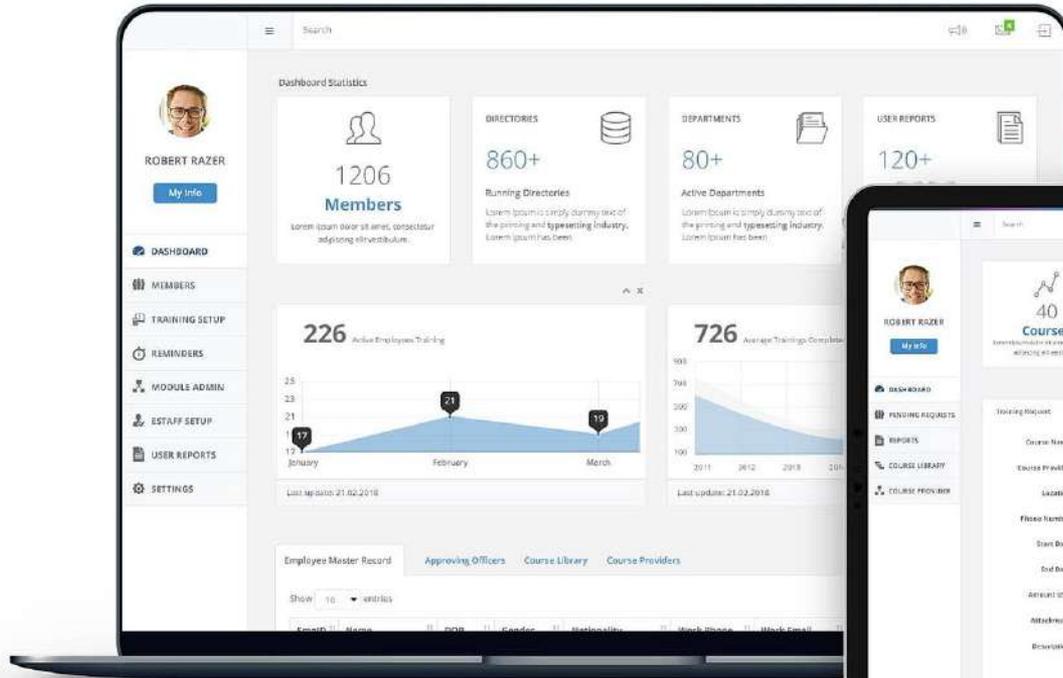

- Windows Server provided robust server infrastructure, while MS SQL 2008 offered scalable database solutions.
- Utilized ASP.NET's built-in security features such as encryption, authentication, and role-based access control.
- Enabled asynchronous data exchange with the server through AJAX, and used JavaScript to facilitate real-time updates and interactions.

Solution Highlights

- Allowed the platform to handle increasing user traffic and data volume effectively, ensuring reliability.
- Safeguarded sensitive data from unauthorized access, ensuring data protection.
- Enabled seamless real-time communication among users, enhancing collaboration and engagement.

Tech Stack

A Comprehensive Initiative Designed to Enhance HR Leadership

Developed a platform to equip participants with the skills, knowledge, and experiences to excel in HR leadership.

Data Visualization

LMS

API Integration

Single Sign-On (SSO)

Outcomes

50% Enhanced Learning Experience

- Enriched the learning experience by providing access to diverse learning resources tailored to individual user profiles.

2x Efficient Data Handling

- Ensured efficient storage, retrieval, and manipulation of program-related data, contributing to smoother operations and decision-making processes.

76% Better Performance

- Guaranteed scalability and high performance to accommodate growing user demands and evolving program requirements.

Solutioning

Challenges

- Ensuring seamless functioning across devices and browsers.
- Integrating various APIs and ensuring seamless communication between different systems.
- Ensuring the security of user data, especially with sensitive information.

Technical Spotlight

- Developed a responsive design using HTML5/CSS3 and jQuery, ensuring cross-platform compatibility.
- Utilized CodeIgniter's modular structure for easier integration of various APIs, simplifying the process of connecting different systems.
- Implemented secure authentication mechanisms and encryption techniques using PHP and JavaScript to protect user data.

Solution Highlights

- Provided a seamless and consistent user experience for all participants across devices and browsers.
- Reduced development time and potential errors, ensuring smoother communication between systems.
- Enhanced data security measures, instilling trust among users by safeguarding their sensitive information.

Ernst & Young

An Asset Management Dashboard to Streamline Operations

Designed and developed specialized features, insights, and analytics.

Asset Lifecycle Management

API Integration

Database Management

UI/UX

Outcomes

55% Increased Asset Visibility

- Better tracking mechanisms lead to an improvement in asset visibility, aiding in effective management.

99% Improved Data Accuracy

- Implementation of robust data management systems increased data accuracy, reducing errors and enhancing reliability.

3x Reduced Downtime

- Proactive maintenance strategies reduced downtime, minimizing disruptions and maximizing operational uptime.

Solutioning

Challenges

- Designing an intuitive and visually appealing user interface across devices, screen sizes, resolutions, etc.
- Ensuring the security of user data transmitted and stored on all types of devices and operating systems.
- Establishing smooth integration between the application and backend systems.

Technical Spotlight

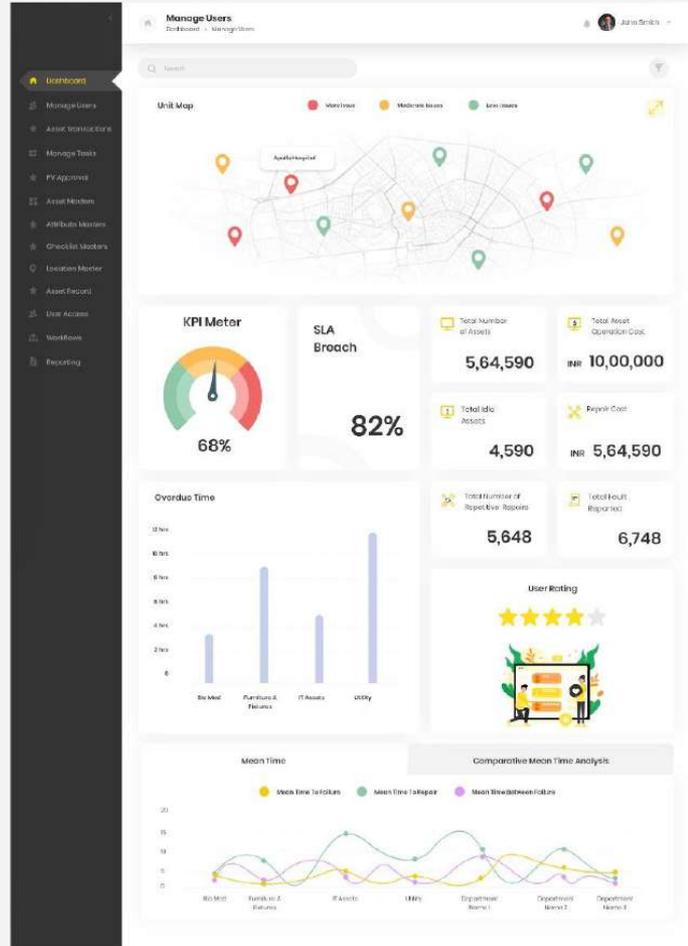

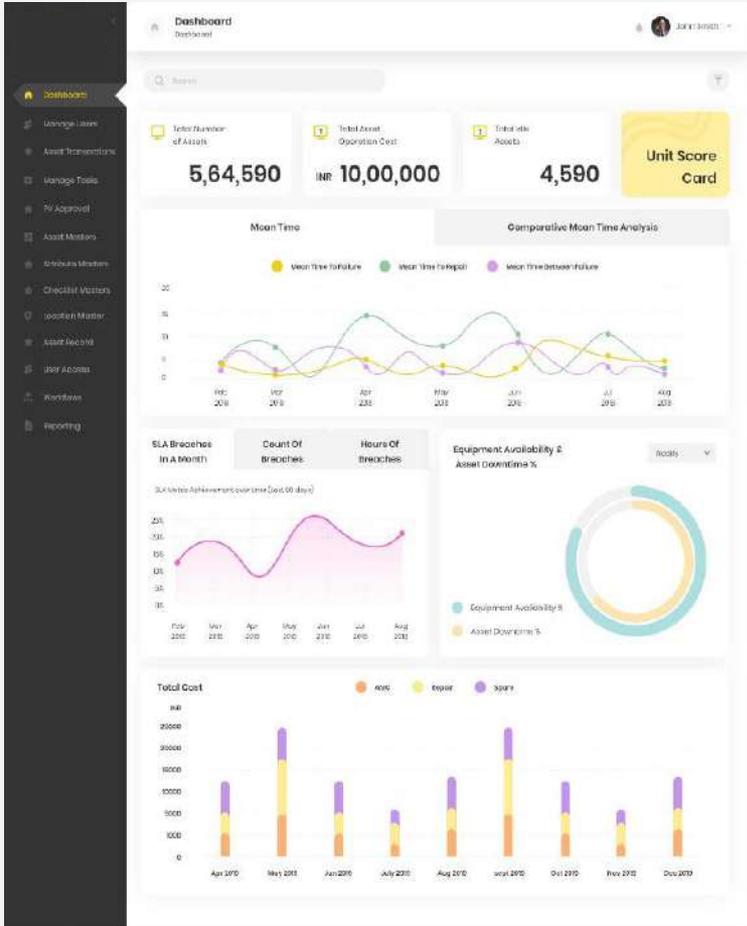

- Utilized Twitter Bootstrap for responsive design and implemented Chart.js for interactive data visualization.
- Secured data transmission with HTTPS and implemented Laravel's encryption methods for sensitive data storage.
- Leveraged Retrofit for seamless integration with backend APIs, ensuring smooth communication between the application and server.

Solution Highlights

- Provided a visually appealing and intuitive interface, improving user engagement and usability.
- Ensures the privacy and security of user and client data.
- Facilitated seamless communication between the application and backend systems, ensuring data consistency and reliability.

Tech Stack

A Platform to Assisting Customers with Personal Taxes

Built to aid users in filing their ITRs, equipped with Tax, HRA, and Residential calculators.

Payment Integration

User Authentication

Tax Calculators

Database Administration

Outcomes

67% Improved Efficiency

- Streamlined processes within the platform, like form autofill and error checking, enhanced efficiency in filing income tax returns, reducing user time and effort.

3x Robust Data Management

- Facilitated efficient data storage and management, ensuring the integrity and accessibility of user and financial data within the platform.

100% Effective Communication Channels

- Integrated real-time communication features enabling users to seek assistance and clarification on tax-related queries promptly.

Solutioning

Challenges

- Integrating and configuring the payment gateway securely within the platform.
- Integrating multiple technologies seamlessly with their differing architectures and requirements.
- Ensuring the security of financial and personal data within the platform, especially during payment transactions.

Technical Spotlight

- Utilized Bill Desk SDKs to streamline integration, reducing the complexity and effort required for implementation.
- Used TypeScript and Angular 7 for a unified architecture, ensuring seamless integration and code quality.
- Implemented encryption techniques and secure coding practices within ASP.NET and MySQL 5.0 to protect sensitive data.

Solution Highlights

- Ensured reliable and secure payment transactions, minimizing the risk of errors or security breaches.
- Streamlined the integration process and reduced development time.
- Ensured the protection of sensitive data, maintaining user trust.

A Feature-Rich ERP for Organizational Excellence

Developed a comprehensive application with features including inventory tracking and financial record management.

Version Control

Data Visualization

API Integration

Real-time Data Management

Outcomes

4x Streamlined Operations

- Created a centralized application that efficiently manages employee records, inventory, financial data, and timesheets.

73% Enhanced Reporting

- Generated customizable reports in formats like PDF, Excel, and CSV, providing stakeholders with comprehensive insights into employee performance, inventory status, and financial trends.

54% Improved Data Visualization

- Enhanced data understanding and facilitating informed decision-making processes.

Solutioning

Challenges

- Handling large volumes of employee records, financial data, and inventory information efficiently.
- Implementing real-time communication features for instant updates and notifications.
- Generating comprehensive reports with various formats and data sources.

Technical Spotlight

- Used Laravel's ORM to simplify complex database operations, managing and manipulate large volumes of data.
- Used Laravel Echo with WebSocket for real-time communication features, enabling instant notifications.
- Utilized Chart.js for dynamic data visualization and PHPExcel for generating comprehensive reports in various formats.

Solution Highlights

- Improved scalability and performance in handling complex operations with large amounts of data.
- Enhanced user experience with real-time updates and notifications.
- Simplified reporting process with visually appealing and customizable reports.

Deloitte

An App for Crisis Management Guidance

Developed a crisis platform with emergency numbers, ambulance services, and advice on appropriate actions.

Emergency response

Security protocols

Real-time updates

Location-based services

Outcomes

70% Better Emergency Response

- Provided quick access to emergency contact numbers and crisis management guidance, facilitating swift and effective responses to critical situations.

4x Enhanced User Experience

- Delivered a visually appealing, easy-to-use, and intuitive interface, enhancing user engagement and satisfaction during crisis scenarios.

5x Strengthened Security

- Ensured the protection of sensitive user information and emergency data.

Solutioning

Challenges

- Handling increased user traffic and data volume as it grows.
- Providing functionality for users to access emergency information even without an internet connection.
- Ensuring smooth and efficient performance, especially in handling real-time updates and data queries.

Technical Spotlight

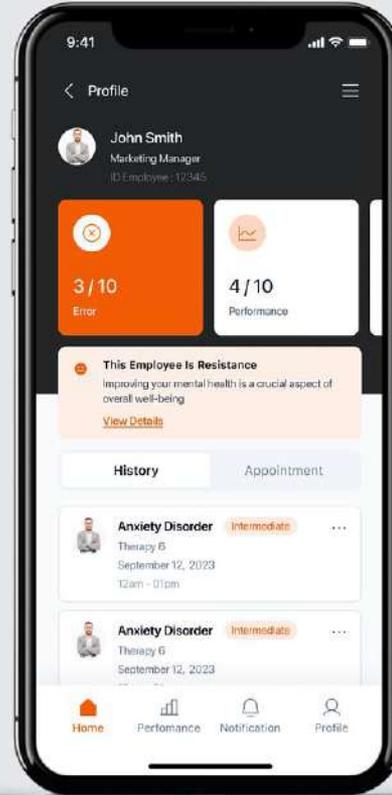

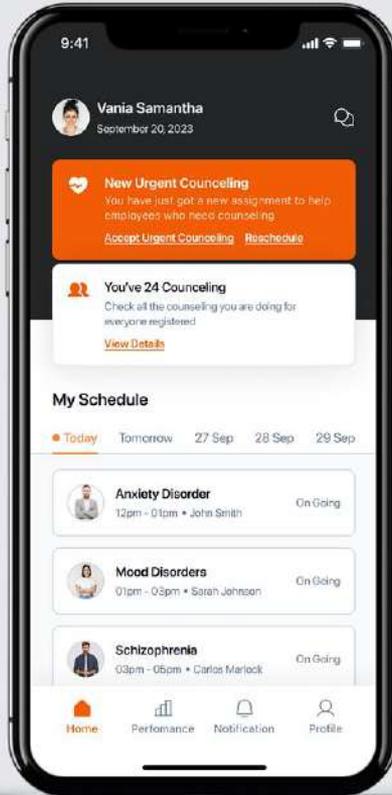

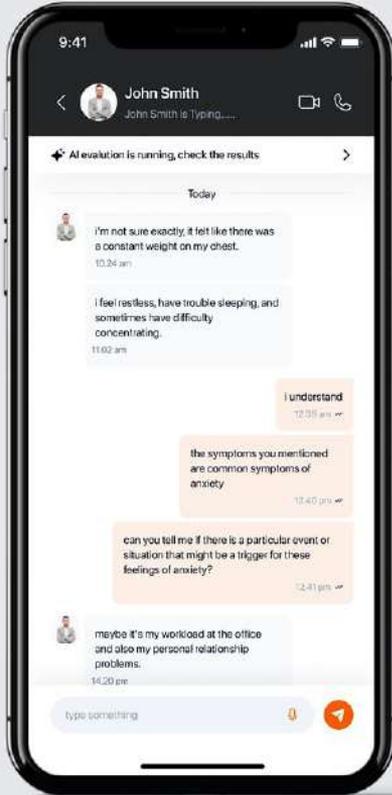

- Utilized AngularJS and ASP.NET Web API to accommodate increased user traffic and data volume.
- Utilized Ionic Framework to provide built-in support for local storage, allowing local storage of essential information for offline access.
- Leveraged MS SQL's caching mechanisms to optimize data retrieval and improve overall performance.

Solution Highlights

- Ensured uninterrupted service and performance even as the user base expands.
- Provided users with access to critical emergency information even without an internet connection.
- Reduced database load and improved response times, ensuring smooth performance even during peak usage periods.

Tech Stack

A Centralized Platform for Company Events

Built a portal with detailed information about events tailored to employee roles and locations.

User Authentication

Location Mapping

Real-time updates

Attendance Tracking

Outcomes

60% Improved Event Management

- Streamlined event organization, enhancing efficiency in event scheduling, location tracking, and attendance management.

5x Enhanced Employee Experience

- Developed a user-friendly interface, leading to improved navigation and seamless access to event information, resulting in a more satisfying employee experience.

73% Streamlined Communication

- Enabled efficient communication and collaboration among employees, fostering enhanced engagement and interaction before, during, and after events.

Solutioning

Challenges

- Integrating various technologies into a single cohesive platform.
- Ensuring accurate location tracking and mapping functionality, even in areas with poor network connectivity.
- Designing a user-friendly interface that caters to diverse user preferences and needs.

Technical Spotlight

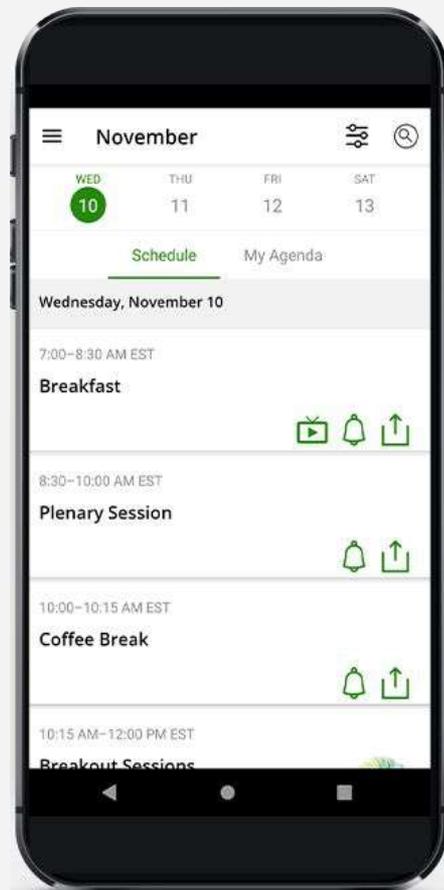

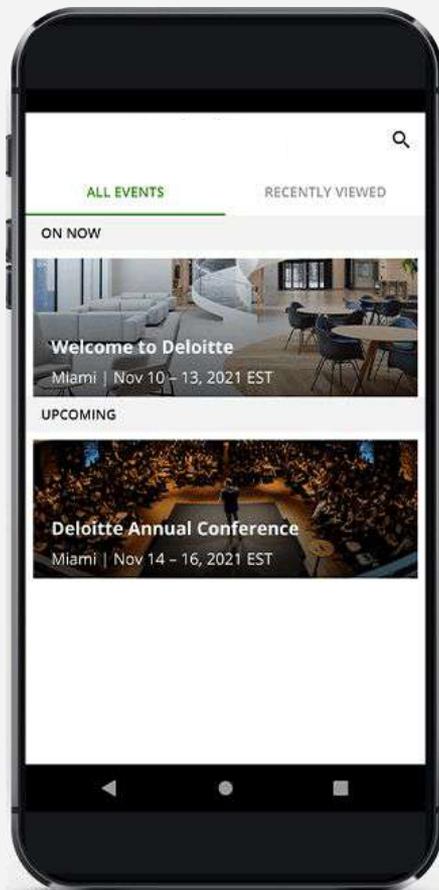

- Utilized ASP.NET's robust framework to streamline integration of various different technologies.
- Employed optimization techniques and fallback mechanisms in Google Maps integration to improve location accuracy.
- Utilized CSS 3, HTML 5, and AngularJS for dynamic and interactive UI elements.

Solution Highlights

- Ensured smooth integration of various technologies, providing a cohesive user experience.
- Enhanced the accuracy of mapping functionality, providing reliable event navigation and location information.
- Provided a visually appealing and intuitive interface, enhancing user satisfaction and engagement.

- Enabled personalized learning paths, interactive course materials, and progress tracking, resulting in an enriched learning experience for users.

68% Better Content Management

- Ensured easy setup of web forms, layouts, and signposts, empowering administrators to manage content effectively and enhance user engagement.

45% Improved Attendance Tracking

- Simplified attendance tracking processes, reducing manual efforts and ensuring accurate and efficient recording of participation in training sessions.

Solutioning

Challenges

- Creating an intuitive and user-friendly interface for optimal engagement.
- Implementing real-time communication features for increased collaboration among users.
- Integrating external APIs and services seamlessly.

Technical Spotlight

- Incorporated AngularJS for front-end development to create an intuitive and responsive user interface.
- Implemented ASP.NET Web API for real-time communication features, enabling seamless collaboration among users.
- Utilized PHP and Drupal 8 for seamless integration of third-party APIs and services.

Solution Highlights

- Developed an intuitive and engaging user interface, enhancing user satisfaction and engagement.
- Facilitated seamless collaboration among users, enhancing productivity and efficiency.
- Enhanced platform functionality and user experience, providing users with additional features and services.

An Exclusive Platform for Partners to Streamline Business Operations

Created a feature-rich portal with customizable filters, communication tools and a feedback system.

Cloud Deployment

Client Relationship Management

Data Analytics

Scalability

Outcomes

76% Enhanced Collaboration

- Integrated communication features such as redirection to call screens and email platforms improved collaboration among partners.

100% Data Security

- Facilitated efficient management of exam questions, scheduling, and user access.

2x Better Feedback Mechanism

- Enabled users to provide valuable insights to managers, fostering continuous improvement and ensuring the application meets user expectations effectively.

Solutioning

Challenges

- Ensuring sensitive client information stored in the application is protected.
- Integrating multiple technologies and frameworks within the platform architecture.
- Maintaining consistency in the user interface design and layout across different sections.

Technical Spotlight

- Used MS SQL's database management system for secure storage and management of client data.
- Utilized TypeScript and Angular 9 for a robust framework for integrating various technologies and frameworks, reducing complexity.
- Used CSS framework to ensure consistency in the user interface design and layout across different sections.

Solution Highlights

- Enhanced data security, protecting sensitive client information from unauthorized access.
- Reduced integration complexity and accelerated time-to-market for new features and updates.
- Provided a visually cohesive and intuitive user interface design, enhancing user engagement and usability.

Partner Portals to Manage Hiring Needs

Built two cutting-edge applications to streamline the application and hiring process.

Cloud Integration

UI/UX

Continuous Integration/Continuous Deployment

Version Control

Outcomes

48% Improved HR Efficiency

- Streamlined the job posting and application process, reducing manual effort and enhancing HR productivity.

66% Enhanced Collaboration

- Integrated collaborative features such as real-time communication and document sharing, facilitating seamless collaboration between HR teams and hiring managers

3x Increased User Satisfaction

- Improved user satisfaction among both HR professionals and job seekers, fostering a more efficient and engaging recruitment process.

Solutioning

Challenges

- Integrating various technologies and platforms with different architectures.
- Ensuring the platform functions seamlessly across different devices and browsers.
- Ensuring the platform can handle a large volume of users and data while maintaining performance and reliability.

Technical Spotlight

- Implemented SpringBoot and Java/J2EE to modularize the application.
- Designed the frontend with responsive design principles using HTML5, CSS, and Angular 8, ensuring cross-platform compatibility.
- Leveraging the scalability and flexibility of Microsoft Azure for hosting.

Solution Highlights

- Facilitated easier integration between components, resulting in a more cohesive and maintainable platform.
- Ensured a consistent and optimized experience across devices, enhancing user satisfaction and engagement.
- Enabled the platform to scale dynamically to meet increasing demand, ensuring consistent performance and reliability even during peak usage periods.

An AI-based Conversational Platform to Assist in Risk Management

Designed a feature-rich mobile and web application to manage the risk lifecycle of the organization.

AI Chatbot

UI/UX

Cloud Deployment

User Access Control

Outcomes

83% Improved Risk Management

- Leveraged conversational AI, enhancing organizational risk identification and management.

5x Better Cybersecurity

- Enhanced resilience against cyber threats, ensuring data security and privacy compliance.

50% Improved Tax Compliance

- Reduced manual effort in tax submissions and income tax return filing, ensuring compliance with tax regulations.

Solutioning

Challenges

- Ensuring accurate data validation and maintaining data integrity.
- Integrating various external technologies and APIs seamlessly within the platform.
- Ensuring robust security measures and compliance with data protection regulations.

Technical Spotlight

- Implemented ASP.NET MVC's built-in validation attributes for server-side validation.
- Developed APIs with ASP.NET Web API to ensure a modular and flexible architecture for seamless integration with external systems.
- Implemented HTTPS for data transmission, SQL injection prevention techniques, and role-based access control using ASP.NET MVC's built-in features.

Solution Highlights

- Ensured data accuracy and integrity with the robust validation frameworks, enhancing overall platform reliability.
- Simplified integration complexity, enabling flawless communication with third-party systems and services.
- Ensured data protection and regulatory adherence, building trust with users and stakeholders.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to user. Please see www.deloitte.com/about for a more detailed description of DTTL and its member firms. This tool is a proprietary software/application based tool developed and, as between the parties, exclusively owned by Deloitte Touche Tohmatsu India LLP (DTIILLP). The tool enables collecting, compiling or obtaining information. User shall not copy, reproduce, modify, distribute, disseminate the tool, nor will the user reverse engineer, decompile, dismantle or obtain access to the underlying formulae of the tool.

Bain and Company

BAIN & COMPANY 

SAP for a Global Fashion Leader

Upgraded the multi-store platform with tailored checkout, multi-language support, and personalized features.

UI/UX

Personalization Support

Multilingual Adaptation

Tailored Checkout Experience

Outcomes

3x Better Product Personalization

- Expanded customization options for products, meeting diverse customer preferences.

54% Improved User Experience

- Streamlined administrative tasks, reducing the time and effort required to manage the ecommerce platform.

100% Tailored Product Support

- Provided comprehensive assistance for product personalization tasks, facilitating a customer-centric approach and satisfaction.

Solutioning

Challenges

- Managing translations for multiple stores ensuring consistent and accurate language representation.
- Adding and modifying custom attributes for configurable products.
- Providing prompt support and technical guidance for product personalization tasks.

Technical Spotlight

- AJAX enhanced user experience by enabling asynchronous communication with servers, resulting in faster, more interactive web pages.
- PHP enabled flexible backend coding, seamlessly creating and managing custom attributes.
- CSS enhanced the presentation and layout of support interfaces, ensuring clear and user-friendly guidance.

Solution Highlights

- Used robust translation tools for consistent language representation across diverse stores, catering effectively to customers.
- Meticulous coding and comprehensive testing ensured seamless integration of these attributes, meeting diverse customer preferences without disrupting product configurations.
- Established a dedicated support system with clear documentation and responsive assistance.

PricewaterhouseCoopers

A Leading UK University's Cutting-Edge Online Portal

Designed an intuitive and elegant E-commerce platform for educational events.

Cloud Integration

UI/UX

Scalability

Data Security

Outcomes

3x Better Maintenance and Support

- Provided ongoing support for the application in maintenance mode, ensuring its reliability and continued functionality.

100% Secure Data

- Prioritized data security with MySQL 5.0, implementing robust measures to safeguard sensitive information and ensure a secure transaction environment.

70% Improved Accessibility

- Ensured compatibility with various Windows server versions, expanding the application's reach and accessibility within the university's existing infrastructure.

Solutioning

Challenges

- Developing an application that functions consistently across various web browsers with differences in rendering engines.
- Achieving real-time data updates and integrating with external APIs, handling data bindings and asynchronous communication.
- Integrating the application with a cloud platform like Microsoft Azure with configuration, deployment, and optimizing for cloud services.

Technical Spotlight

- Implement responsive design using Twitter Bootstrap.
- Utilize Angular for dynamic data handling and AJAX for asynchronous API consumption.
- Seamlessly integrated with Microsoft Azure, leveraging its cloud capabilities to enhance scalability, flexibility, and accessibility.

Solution Highlights

- Users experienced a uniform and reliable interface regardless of the browser they use, contributing to a positive and consistent experience.
- Created a responsive and interactive application that delivers timely information and services.
- Improved performance, scalability, and reliability, while providing a platform for future enhancements and features.

RPA for a Leading Global Accounting Service

Built a next-gen processing system for streamlined operational tasks and processing.

Automation

Data Management

Cloud Enablement

Outcomes

99% Error-free Processing

- Automated payroll management ensured accurate operations and flawless outputs.

5x Reduced Processing Time

- Fully automated platform with no manual interventions for managing and processing payroll.

90% Reduced Salary Delays

- On-time and efficient payroll updates ensured timely employee salary clearance.

Solutioning

Challenges

- Manual efforts involved for processing salary and calculating attendance.
- Manual data entries consumed a lot of time and accompanied human errors.
- Lot of time consumed in rectifying payroll records.

Technical Spotlight

- Data binding improved the overall user experience with the help of Node.js.
- Authentication mechanisms in MongoDB ensured uplifting of the overall security system.
- Collaborative integration in UiPath enabled hassle-free built-in handling for word, excel, and other applications.
- Experienced rich debugging support with .NET framework to attain accurate outputs.

Solution Highlights

- Engineered an RPA-driven payroll processing system that reduces the manual-intensive aspects and speeds up the payroll operations.
- Automated payroll handling ensures 100% flawless and accurate outputs.
- Consolidated data system where the data of every employee is read automatically with real-time data validation.
